

Monthly Global Newsletter

July 2025 Edition

Welcome to the July 2025 edition of C-PRAV's Monthly Global Newsletter!

This month brings significant regulatory milestones and global updates. In Australia, the long-anticipated AS/NZS 62368.1:2022 standard is now officially in effect, setting new safety compliance expectations for telecom, IT, and AV equipment. Meanwhile, across the globe, we're seeing dynamic changes—from South Korea's revised EMC testing methods, to Canada's new millimetre-wave certification rules, and Ukraine expanding radio frequency bands. These developments highlight the ever-evolving landscape of global product compliance.

Be sure to also check out our upcoming Concept to Consumer Roadshow this October and insights from NATA's Accreditation Matters event—both shaping conversations in compliance and certification excellence.

As always, C-PRAV is here to keep you informed — and to help you navigate these changes with confidence.

Choose Compliance. Choose Certifications.
Choose C-PRAV with Confidence.

Global Regulatory Updates

**C-PRAV's CEO Praveen Rao @
NATA's Accreditation Matters**

C-PRAV was proud to be part of this year's *Accreditation Matters* event hosted by NATA — Australia's national accreditation body. Our CEO, **Mr. Praveen Rao**, delivered an insightful presentation on "**Why Accredited Testing is Important**", highlighting the vital role of accredited labs in ensuring technical accuracy, global acceptance, and regulatory trust in compliance pathways.

In his talk, Praveen shared real-world case studies of how unaccredited testing can delay approvals, increase costs, and create market access issues — especially in high-risk sectors like medical, telecom, and automotive. He also outlined how **ISO/IEC 17025 accreditation** helps ensure impartiality, repeatability, and confidence in test results. The session reinforced a key message: In today's fast-paced regulatory environment, **accredited testing isn't just preferred — it's essential.**
